

Osney & St Thomas Bulbs for sale September 2019

Crocus tommasinianus Whitewell Purple. £1.00 / 10

A charming shade of reddish mauve. Hardy, free flowering variety. 5cm+ bulbs supplied.

Planting Growing Instructions

Plant from September to December at approx 5cm deep and 5cm apart. Can be planted under trees, under shrubs, in borders and containers. Plant in groups for the best effect.

Cultural Instructions

Leave undisturbed after flowering and they will bloom year after year

Flowering Time. February-March

Crocus Yalta

A large crocus with striking blue and white flowers. Height 10-15cm. Flowers February-March. 5cm+ bulbs supplied.

Planting Growing Instructions

Plant from September to December at approx 5cm deep and 5cm apart. Can be planted under trees, under shrubs, in borders and containers. Plant in groups for the best effect.

Cultural Instructions

Leave undisturbed after flowering and they will bloom year after year

Flowering Time

(February-March)

Osney & St Thomas Bulbs for sale September 2019

Narcissi Minnow. £2.00 per 5

This miniature daffodil is simply a jewel for lovers of rockery displays. It is only 15cm tall and produces two to four dainty little soft yellow flowers per stem. This variety is well known for its ability to increase rapidly. 10cm+ bulbs supplied.

Planting Growing Instructions

Plant at least 10cm deep in the autumn. Space as desired or plant in clumps for a cluster display. Daffodils prefer a spot well sheltered from the wind, preferably with plenty of access to sun.

Cultural Instructions

Best planted in well drained, fertile soil. Keep soil moist during the growing season and allow the leaves to die back naturally before deadheading. They can be lifted and moved once the foliage has died off or they can be left to naturalise when planted in grass or under trees, where they can be left undisturbed for years.

Flowering Time. March - April

Osney & St Thomas Bulbs for sale September 2019

Prepared Hyacinth Aiolos £1.00 per bulb

New pure White variety. Excellent forcing variety. Supplied as 16-18cm hyacinth bulbs.

Planting Growing Instructions

For indoor cultivation of prepared or top sized hyacinth bulbs you should plant in fibre, and keep in a cool dark cupboard for 6-8 weeks. Water when required to ensure that the fibre is not allowed to dry out. The cooler they are stored, the longer the bulbs will last. They can be taken into the room and placed in daylight only when the roots have been well established and buds appear.

Cultural Instructions

Prepared Hyacinth can be in flower as early as Christmas. These Hyacinth are specially treated in a way that makes them very suitable for early forcing. They should be planted or boxed directly upon arrival.

Flowering Time. December - February

Prepared Hyacinth Blue Pearl £1.00 per bulb

Large dark blue florets with pale petal edges. Supplied as 16-18cm hyacinth bulbs.

Planting Growing Instructions

Flowering Time

(December-February)

Allium Albopilosum (Christophii) £3.50 per 10

Gigantic heads of silvery lilac on a stocky 30cm stem. Beautiful curled green leaves. The leaves wither before the flowers appear in early summer. Flowers June-July. Height 50cm. 10cm+ bulbs supplied.

Planting Growing Instructions

Plant in fertile well drained soil at approx 15cm apart and at a depth of roughly 3 to 4 times the size of the bulb.

Cultural Instructions

Leave untouched for a number of years until the bulbs have multiplied to the extent that flowering potential is impeded.

Flowering Time. June - July

Osney & St Thomas Bulbs for sale September 2019

Iris Katherine Hodgkin. £3.50 per 10

At 15cm tall, this is quite tall for a dwarf iris. It will produce in late February or early March delicate little flowers, with blue/yellow markings. 6cm+bulbs supplied.

Planting Growing Instructions

Bulbs are to be planted 8cm deep and about 10-12cm apart, in well drained soil. It is often best to try to position them with plenty of access to sun. For best results, plant in September through to November.

Cultural Instructions

Take some care to prevent slugs and snails from attacking the iris once planted. Most Iris can naturalise well if left undisturbed or alternatively bulbs can be lifted and separated in Autumn. After flowering feed with a high potash fertiliser to encourage large bulbs to form.

Flowering Time

(February-March)

Iris Reticulata Blue Note £2.00 per 10

Fragrant flowers with dark edges and white markings. 5cm+ bulbs supplied.

Flowering Time. February March

Osney & St Thomas Bulbs for sale September 2019

Tulip Black Hero. £6.00 per 10

Bred from Queen of Night, a black beauty. Height 60cm. 11/12cm bulbs supplied.

Planting Growing Instructions

Plant bulbs in well dug soil about 8-10cm deep and approx 15cm apart. It is often beneficial to use a little bonemeal or super phosphate mixed in with the soil. Tulips delight during their growth in a sunny location.

Cultural Instructions

After the tulips have bloomed and when leaves fade and turn brown the bulbs can be lifted, dried, cleaned and stored in a cool place until planting time. Tulips should not be grown in the same soil for several years, so replace with fresh soil every other year.

Flowering Time. May

Tulip Purissima (White Emporer). £4.00 per 10

Very large milky white flowers, a white sport of the well-known Madame Lefeber, with all its excellent qualities. Height 35-40cm. Flowering April. 11cm+ bulbs supplied.

Planting Growing Instructions

Plant bulbs in well dug soil about 8-10cm deep and approx 15cm apart. It is often beneficial to use a little bonemeal or super phosphate mixed in with the soil. Tulips delight during their growth in a sunny location.

Cultural Instructions
